

MARCH 2, 2012

These new products from Vichy radiate - Neovadiol Lumiere and ProEVEN!

Vichy Neovadiol Lumiere - 40ml - \$44 - an anti-aging BB Cream specifically for menopausal skin and suitable for all skin types, even sensitive. Redefines, densifies and sculpts facial volumes, nourishes and smoothes the skin while creating a natural, healthy glow that evens and illuminates the complexion. With a formula that combines Pro-Xylane and Proteic Gf - tissue reconstructors of vegetable origin; and rosy coloured pigments and mother of pearl to revive skin's radiance with a sheer satin finish. In one shade which adapts to different complexions.

What's different about this BB Cream is that the tint is a pinky shade as opposed to a skin shade so it really does perk your skin up and add a glow!
